

Vista ABI™ (Model # L450VA)

Summit Doppler Systems offers a selection of automated ABI systems for the diagnosis of peripheral arterial disease (P.A.D.) that are fast, efficient and meet reimbursement criteria. The **Vista ABI** was designed for clinicians who want to begin performing the ABI exam into their practices now with the possibility of adding accessories, like the arterial photoplethysmography (PPG) probe and PC download software, later. This system includes 2 modalities: PVR and a bi-directional Doppler probe, automated cuff inflation and deflation, built-in printer, graphic waveform display with step-by-step ABI instructions and 4 blood pressure cuffs. An optional PPG package (L450PG) and optional software package (L450SF) are purchased separately.

The Vista ABI does not accommodate segmental exams. For performing customized segmental exams, consider the Vista AVS, a full-featured ABI/vascular system.

Features:

- Obtains two pressures at each ankle site (PT and DP)
- Automatic cuff inflation and deflation system
- Graphic waveform display with step-by-step instructions
- Automatic ABI calculation
- Perform the Seated ABI on mobility impaired patients
- Bi-Directional Doppler probe (8 MHz) with 4 blood pressure cuffs
- Pulse Volume Recording (PVR) waveform modality
- Ships in 2 boxes: 1.) 16 lbs. with dimensions of 16 x 12 x 12 and 2.) 13 lbs. with dimensions of 34 x 22 x 7
- Full 1-year product warranty
